DETAILED ACTION

This office action is in response to an amendment filed 12/1/03. Claims 12, 15, 46, 52-57 and 60-61 have been cancelled. Claims 7-9, 16-17, 39, 42-43, 62 and 64 have been amended. Claims 1-11, 13-14, 16-45, 47-51, 58-59 and 62-66 are pending in the instant application.

An IDS filed 12/1/03 has been identified and the documents considered. The signed and initialed PTO Form 1449 has been mailed with this action. Subsequently, an IDS filed 4/11/03 has been identified in the file. The documents on this IDS have been considered but the documents have been crossed out as the IDS filed 4/11/03 is a duplicate of the IDS filed 12/1/03. There is a new rejection herein and therefore the rejection is non-final.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Oncolytic Adenoviral Vectors is not descriptive of the complexity of the instant invention.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1636

Claim 7 is vague and indefinite in that the metes and bounds of “or the corresponding functions in other adenoviral serotypes” are unclear. It is unclear whether the recombinant viral vector comprises the deletion **or** corresponding functions in other Adenovirus or alternatively, the deletion is of the nucleotides 103-551 **or** in the corresponding function. Furthermore, it is unclear as written to what “corresponding function” refers. It would be remedial to recite “or a deletion in nucleotides encoded by corresponding regions of other Adenovirus serotypes”. **This is a new rejection.**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 62-64 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is a new rejection. This is a new matter rejection.**

Claims 62-64 recite the limitation that the recombinant viral vector comprises “a heterologous transcriptional regulatory sequence operably linked to a coding region of a gene that is essential for replication of said vector”. The disclosure only teaches operably linking E1A, a gene required for replication, to E2F and osteocalcin promoters. The disclosure does not provide literal support for the inclusion of the limitation that the gene essential for replication of the vector is operably linked to any heterologous transcriptional regulatory sequence.

Conclusion

Claims 1-6, 8-11, 13-14, 16-45, 47-51, 58-59 are allowed.

Claims 7 and 62-64 are rejected.

Claims 65-66 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
